

## BUILD GREEN PROJECTS IN JEFFERSON COUNTY

**Spring Valley Cottages** is Jefferson County's first Built Green® neighborhood! Nestled in the Happy Valley area of Port Townsend, this cottage neighborhood is close to town and schools. The vision was to design using less waste, a passive solar house that is environmentally friendly and healthy.

Builder: Fred Kimball & Rick Landis

### **Rainshadow Environmental Homes**

This is a demonstration of the Jefferson County Home Builders BuiltGreen Guidelines. The vision was to design using less waste, a passive solar house that is environmentally friendly and healthy.

Designer: Ann Raab

### **Gilmore Home**

In this 1690 square foot home, skylight and transom windows, as well as interior windows and glass doors, naturally light the inside spaces.

Designer: Ann Raab

**Dumenil Home**

This 2440 square foot home has both thermal hot water collectors and photovoltaic roof panels with in-floor radiant heat. The design has multi-use spaces including a small kitchenette upstairs for a separate unit.

Designer: Ann Raab

**Garrison Home**

All the trim is harvested from trees cut on the site.

Designer: Ann Raab

**Umatilla Hill** The homes we have created are nostalgic in appearance only. They incorporate space-saving designs, quality construction and artistic details. This close-knit community is just minutes from historic downtown Port Townsend.

Builder: Fred Kimball & Rick Landis
